ACKNOWLEDGMENTS

This volume was prepared under the direction of William Lerner, Chief, Statistical Compendia Staff, Data User Services Office. Helen E. Teir assisted in planning of content and review. Charles S. James was responsible for coordination of procedures and technical supervision. Alma L. Butler was responsible for supervision of editing and clerical operations, assisted by Kay Swenson. Robert Higdon was responsible for computer programming and operations, assisted by William Lisowski.

Morton A. Meyer, Chief, Geography Division; Gerald J. Post, Assistant Chief; and Silla G. Tomasi and Susan B. Hardy were responsible for providing the geographic delineations and related data and the maps.

Donald E. Starsinic, Population Division, was responsible for compilation of 1970 census population totals for congressional districts.

The *Congressional District Data Book* is issued as a part of the publication program of the 1970 Census of Population and Housing.

Library of Congress Card No. A 63-7725

ELECTIONS AND POPULATION

ITEMS INCLUDED

Item No.	ELECTIONS	Item No.	CENSUS OF POPULATION, 1970 - Con.
			AGE
1	Vote cast for Representative, 1970	100	Under 5 years
2	Democratic Party	101	5-13 years
3	Republican Party	102	14-15 years
4	Percent for party with most votes	103	16-17 years
5	Vote cast for Representative, 1968		
6	Democratic Party	104	18-20 years
7	Republican Party	105	21-24 years
8	Percent for party with most votes	106	25-34 years
9	Vote cast for Representative, 1966	107	35-44 years
10	Democratic Party	108	45-54 years
11	Republican Party	109	55-61 years
12	Percent for party with most votes	110	62-64 years
		111	65 years and over
13	Vote cast for President, 1968		
14	Democratic Party	112	18 years and over
15	Republican Party	113	White
16	American Independent Party	114	Negro
17	Percent for party with most votes	115	18 years and over, Spanish heritage
		116	Median age, total population
		117	Median age, voting age population
			HOUSEHOLDS AND FAMILIES
18	Total population, 1970	118	Number of households
19	Percent of State total	119	Number of families
20	Total population, 1960	120	Number of unrelated individuals
21	Percent change, 1960 to 1970	121	Population in group quarters
22	Average population per district, 1970	122	Inmates of institutions
23	Population above (+) or below (-) average		
24	Percent above (+) or below (-) average		
25	Land area		
	Population per square mile, 1970		
			MARITAL STATUS
		123	Male, 18 years old and over
26	Male	124	Married (excludes separated)
27	Female	125	Widowed
		126	Divorced
		127	Single
28	Urban		
29	Percent of total population	128	Female, 18 years old and over
30	Rural nonfarm	129	Married (excludes separated)
31	Rural farm	130	Widowed
		131	Divorced
32	Metropolitan (SMSA)	132	Single
33	Percent of total population		
34	Urban		
35	Central cities		
36	Outside central cities		
37	Rural		
38	Nonmetropolitan		
			EDUCATION
		133	Public school enrollment (ages 3-34)
		134	Percent Negro
		135	Nursery and kindergarten
		136	Elementary (grades 1-8)
		137	Secondary (grades 9-12)
		138	Private school enrollment
39	White	139	Elementary (grades 1-8)
40	Negro	140	Secondary (grades 9-12)
41	Percent of total population	141	College enrollment
42A	American Indian		
42B	Japanese	142	Persons 25 years old and over
42C	Chinese	143	Completed 5 years of school or less
42D	Filipino	144	Completed 8 years of school
		145	Completed 4 years of high school or more
50A	Persons of Spanish heritage	146	Completed 4 years of college or more
50B	Percent of total population	147	Median years of school completed
			INCOME IN 1969
60	Total foreign stock		Families with income of--
61	Percent of total population	148	Less than \$3,000
62	Foreign born	149	\$3,000-\$4,999
63	Native of foreign or mixed parentage	150	\$5,000-\$9,999
		151	\$7,000-\$9,999
	Country of origin of foreign stock:*	152	\$10,000-\$14,999
	Austria	153	\$15,000-\$24,999
	Canada	154	\$25,000 or more
	Czechoslovakia	155	Percent families with \$15,000 or more
	Denmark		
70A	Finland	156	Median family income
to	France	157	White
70V	Germany	158	Negro
	Greece	159	Unrelated individuals, median income
	Hungary	160	Per capita income, all persons
	Ireland		
	Italy		
	Yugoslavia		
	Mother tongue (other than English):		Families below--
80A	French	161	Low income level
80B	German	162	Percent of all families
80C	Hungarian	163	Percent with female heads
80D	Italian		Persons
80E	Polish	164	Low income level
80F	Russian	165	Percent related children under 18 years
80G	Spanish	166	Percent 15 years and over
80H	Swedish	167	Number of unrelated individuals
80I	Yiddish

POPULATION AND HOUSING

Item No.	CENSUS OF POPULATION, 1970—Con.	Item No.	CENSUS OF HOUSING, 1970
	VETERAN STATUS		
168	Civilian males, 18 years old and over	234	All housing units (incl. seasonal and migratory)
169	Veterans	235	All year-round units
170	Percent of total	236	Urban
171	Vietnam	237	Rural nonfarm
172	Korea	238	Rural farm
173	World War II		
174	World War I and other service	239	Metropolitan (SMSA)
	EMPLOYMENT STATUS	240	Urban
175	Total labor force, 16 years old and over	241	Central cities
176	Armed Forces	242	Outside central cities
177	Civilian	243	Rural
178	Employed	244	Nonmetropolitan
179	Unemployed	245	Occupied units
180	Percent of civilian labor force	246	White
181	Male civilian, 16 years old and over	247	Negro
182	Employed	248	Owner-occupied units
183	Unemployed	249	Percent of all occupied
184	Female civilian, 16 years old and over	250	White
185	Employed	251	Negro
186	Unemployed	252	Renter-occupied units
	CLASS OF WORKER	253	White
187	Private wage and salary workers	254	Negro
188	Government workers		
189	Federal	255	Year-round units—
190	State	256	With 1 and 2 rooms
191	Local	257	With 3 and 4 rooms
192	Self-employed workers	258	With 5 and 6 rooms
	INDUSTRY	259	With 7 rooms or more
193	Employed in—	260	Median number of rooms
194	Manufacturing	261	With 1 unit in structure
195	Transportation, communications, and other public utilities	262	With 2-4 units in structure
196	Construction	263	With 5-49 units in structure
197	Agriculture, forestry, and fisheries	264	With 50 or more units in structure
198	Mining	265	Mobile home or trailer
199	Wholesale and retail trade	266	In structure built—
200	Finance, insurance, and real estate	267	1960 to March 1970
201	Business and repair services	268	1950 to 1959
202	Personal services	269	1940 to 1949
203	Professional and related services	270	1939 and earlier
204	Educational services	271	
205	Public administration	272	With 1-1½ bathrooms
	OCCUPATION	273	With 2 or more bathrooms
206	Male employed:	274	With other bathroom arrangement or none
207	White collar	275	Occupied units—
208	Percent of total		With all plumbing facilities
209	Professional and technical workers		1 or more persons per room
210	Managers and administrators	276	Lacking some or all plumbing facilities
211	Salesworkers	277	Percent of occupied units
212	Clerical workers	278	Persons per unit:
213	Blue collar	279	1 person
214	Craftsmen and foremen	280	2-3 persons
215	Operatives		4-5 persons
216	Nonfarm laborers	281	6 persons or more
217	Service workers	282	Median
218	Farmworkers		Persons per room:
219	Female employed:	283	1.00 or less
220	White collar	284	More than 1.00
221	Percent of total		Automobiles available:
222	Professional and technical workers		1 per household
223	Managers and administrators	285	2 or more per household
224	Salesworkers	286	Value:
225	Clerical workers	287	Specified owner-occupied units
226	Blue collar	288	Less than \$5,000
227	Operatives	289	\$5,000-\$9,999
		290	\$10,000-\$14,999
		291	\$15,000-\$19,999
		292	\$20,000-\$24,999
		293	\$25,000-\$34,999
		294	\$35,000-\$49,999
			\$50,000 or more
			Median value
	MEANS OF TRANSPORTATION TO WORK		Gross monthly rent:
228	Workers using private automobile	295	Specified renter-occupied units
229	Workers using public transport	296	Less than \$40
	MIGRATION	297	\$40-\$59
230	Persons 5 years old and over, 1970	298	\$60-\$79
	Residence in 1965:	299	\$80-\$99
231	Same house as in 1970 (nonmovers)	300	\$100-\$149
232	Different house, same State	301	\$150-\$199
233	Different State or abroad	302	\$200 or more
		303	Median rent

Congressional District Data Book

INTRODUCTION

This volume, the third in the *Congressional District Data Book* series, presents a variety of data from the 1970 census and recent election statistics for districts of the 93d Congress, elected in 1972. It also presents maps for each State showing counties, congressional districts, and selected places.

The first report for congressional districts in this series published by the Bureau of the Census appeared as Appendix G in the *County and City Data Book, 1956*. That appendix, which presented a limited selection of demographic and economic statistics for whole-county districts only and elections data for all districts, was subsequently issued as a reprint entitled "Selected Data for Congressional Districts." The initial *Congressional District Data Book* presented figures for districts of the 87th Congress, which was elected in 1960. The second *Data Book* presented statistics for districts of the 88th Congress, and was followed by a series of supplements for States that redistricted for the 89th and 90th Congresses.

A series of State reports entitled *Congressional District Data, Districts of the 92d Congress* (series CDD-92), was issued in 1971, presenting basic 1970 population and housing data and recent election statistics. In 1971-1972, these data were reissued in a partial series (30 States) for districts of the 93d Congress. That interim series (CDD-93X) was followed in 1972 by a *Congressional District Data Book* series (CDDDB-93) for all States, presenting a much broader selection of 1970 census data for districts as constituted for the 93d Congress. The latter series forms the basis for this volume.

A *Congressional District Atlas* depicting the boundaries of all congressional districts was issued in 1960 for the 86th Congress, and has been issued biennially since 1964 for the 89th, 90th, 91st, 92d, and 93d Congresses.

In 1972, the Bureau of the Census also issued a series of *Congressional District Computer Profiles* for each district and each State (except single-district States) presenting 1970 census data in the form of analytical text and statistical tables for districts of the 93d Congress. Although prepared primarily for the use of Congressmen and their staffs, these computer-generated narrative profiles are available to the public from:

U.S. Department of Commerce
National Technical Information Service
Springfield, Virginia 22151

Orders for the *Profiles* should be addressed to that agency. The *Profiles*, which present much of the same data contained in this volume, are available on microfiche (sheet microfilm) at 95 cents per State (regardless of the number of districts) or on paper copies reproduced from microfiche, with the price varying from \$3.00 to \$13.00 per State.

CONGRESSIONAL APPORTIONMENT

The Constitution provides that "Representatives...shall be apportioned among the several States...according to their respective numbers..." and that "the number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least one Representative...."

The primary reason for the establishment of the decennial census of population, as set forth in the Constitution, was to provide a basis for the apportionment of members of the House of Representatives among the several States. Such an apportionment has been made on the basis of every census from 1790 to 1970, except that of 1920. Prior to 1870, the population basis for apportionment was the total free population of the States, omitting Indians not taxed, plus three-fifths of the number of slaves. After the apportionment of 1860 the fractional count of the number of slaves, of course, no longer applied. In 1940 it was determined that there were no longer any Indians who should be classed as "not taxed" under the terms of the apportionment laws. The 1940 and 1950 apportionments, therefore, were made on the basis of the entire population of the 48 States, and that of 1960 on the basis of the entire population of the 50 States. The 1970 apportionment was based on the population of the 50 States and, for the first time, American military and civilian personnel of the Federal Government and their dependents overseas, allocated to their State of residence. All apportionments are made under the constitutional provision, noted above, that each State should have at least one Representative, no matter how small its population.

The population base for apportionment and other significant items are shown in table A below. The results of each apportionment, starting with the initial apportionment in 1789 and including the apportionments based on each census from 1790 to 1970, are shown by States in Appendix A, page 548.

The first attempt to make provision for automatic reapportionment was included in the act for the taking of the seventh and subsequent censuses (approved May 23,

TABLE A. Population Base for Apportionment and the Number of Representatives Apportioned: 1790 to 1970

Census Year	Population base ¹	Number of Representatives ²	Ratio of apportionment population to Representatives	Date of apportionment act
1970	204,053,325	435	³ 469,088	Nov. 15, 1941
1960	178,559,217	435	410,481	Nov. 15, 1941
1950	149,895,183	435	344,587	Nov. 15, 1941
1940	131,006,184	435	301,164	Nov. 15, 1941
1930	122,093,455	435	280,675	June 18, 1929
1920	(⁴)	435	(⁴)	(⁴)
1910	91,603,772	435	210,583	Aug. 8, 1911
1900	74,562,608	386	193,167	Jan. 16, 1901
1890	61,908,906	356	173,901	Feb. 7, 1891
1880	49,371,340	325	151,912	Feb. 25, 1882
1870	38,115,641	292	130,533	Feb. 2, 1872 ⁵
1860	29,550,038	241	122,614	May 23, 1850 ⁶
1850	21,766,691	234	93,020	May 23, 1850 ⁷
1840	15,908,376	223	71,338	June 25, 1842
1830	11,930,987	240	49,712	May 22, 1832
1820	8,972,396	213	42,124	Mar. 7, 1822
1810	6,584,231	181	36,377	Dec. 21, 1811
1800	4,879,820	141	34,609	Jan. 14, 1802
1790	3,615,823	105	34,436	Apr. 14, 1792
.....	...	65	⁸ 30,000	Constitution, 1789

¹ Excludes the population of the District of Columbia, the population of the Territories, (prior to 1940) the number of Indians not taxed, and (prior to 1870) two-fifths of the slave population. In 1970, includes selected groups of Americans abroad.

² This number is the actual number apportioned at the beginning of the decade.

³ Ratio of resident population to Representatives in 1970 is 465,468.

⁴ No apportionment was made after the census of 1920.

⁵ Amended by act of May 30, 1872.

⁶ Amended by act of Mar. 4, 1862.

⁷ Amended by act of July 30, 1852.

⁸ The minimum ratio of population to Representatives stated in the Constitution (art. 1, sec. 2).

1850). By specifying the total number of Representatives to be assigned and method to be used, Congress hoped to eliminate the need for a new act every decade and assure an equitable distribution of Representatives. When this Census Act was superseded in 1879, the automatic feature was discontinued, and the method of computing the apportionment was determined by Congress for each subsequent apportionment.

No reapportionment was made after the Census of 1920, the apportionment of 1910 remaining in effect. The 1929 act which provided for the 1930 and subsequent censuses stipulated that, unless Congress within a specified time enacted legislation providing for apportionment on a different basis, the apportionment should be made automatically by the method last used. In accordance with this act, a report was submitted by the President to Congress on December 4, 1930, showing the apportionment computations both by the method of major fractions (which was the one used in 1910) and by the method of equal proportions. In 1931, in the absence of additional legislation, the automatically effective apportionment followed the method of major fractions.

In 1941, the law was amended to the effect that apportionments based on the 1940 and subsequent censuses should be made by the method of equal proportions. In the application of this method, the Representatives are so assigned that the average population per Representative has the least possible relative variation between one State and any other.

The number of seats in the House of Representatives was fixed in 1929 at the current figure, 435, the number established by the last previous act in 1911. In 1959, the number was increased temporarily to 437 with the admission of Alaska and Hawaii, to return to 435 with the reapportionment following the 1960 census.

For further information on the relationship between the Census of Population and congressional apportionment, see 86th Congress, 2d session, *Congressional Apportionment—Role of the Bureau of the Census*, House Report No. 2223, U.S. Government Printing Office, September 1960; and 91st Congress, 2d session, *The Decennial Population Census and Congressional Apportionment*, House Report No. 91-1314, U.S. Government Printing Office, July 1970.

CONGRESSIONAL DISTRICTS

Although the creation of congressional districts is not explicitly required by the Constitution, election from such districts has been the rule.

The Constitution does provide that “the times, places, and manner of holding elections for...Representatives shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter such regulations....” The first congressional regulation affecting congressional district boundaries was enacted in 1842 and required every State populous enough to be entitled to more than one Representative to be divided by the State legislature into districts “composed of contiguous territory,” each returning one member. The districting requirement was omitted in the apportionment act of 1850, but an act of 1862 revived the provisions of the act of 1842. The apportionment act of 1872 continued the original requirement and added a provision that districts should contain “as nearly as practicable an equal number of inhabitants.” The apportionment law of 1901 added a requirement that the districts be compact. The 1911 reapportionment act provided that Representatives “be elected by districts composed of a contiguous and compact territory containing as nearly as practicable an equal number of inhabitants.” In 1901 and 1910, refusal to seat members from districts clearly violating the legislative standards was debated but never carried out. In the Automatic Reapportionment Act of 1929, the regulations of the 1911 act were omitted. There were no congressional regulations affecting congressional district boundaries until 1967 when Congress enacted legislation, effective for most States in 1968 and for all States beginning with the 1970 elections, requiring States with more than one Representative to divide their territory into single-member districts.

“ONE PERSON, ONE VOTE”

Prior to 1962, questions relating to apportionment and redistricting were not accepted for judgment by Federal courts on the grounds that they ought to be resolved by the legislative branches of government (Congress and the State legislatures). In 1962, however, in the case of *Baker v. Carr* (challenging State legislative districts in Tennessee), the U.S. Supreme Court ruled that the courts have authority, under the “equal protection” clause of the Fourteenth Amendment, to decide cases involving inequality of population among legislative districts. Over the next few years, in a series of cases concerning voter representation, the Supreme Court further extended court participation. Speaking for the majority in *Gray v. Sanders* in 1963 (a case which overturned the “county unit” election system in Georgia), Justice William O. Douglas said in part: “The conception of political equality from the Declaration of Independence, to Lincoln’s Gettysburg Address, to the Fifteenth, Seventeenth, and Nineteenth Amendments can mean only one thing—one person, one vote.”

In *Wesberry v. Sanders* in 1964, the Supreme Court invalidated the congressional district system in Georgia, where the largest district had 823,680 inhabitants, compared with 272,154 in the smallest district. This time the Court based its decision on Article I, Section 2 of the Constitution, which states that Representatives in Congress shall be elected “by the people of the several States.” Writing for the majority, Justice Hugo L. Black concluded that, historically interpreted, this Section means that “as nearly as is practicable one man’s vote in a congressional election is to be worth as much as another’s....”

As a result of the Court’s decisions requiring that election districts be “as nearly as practicable” equal in population, most of the States revised their congressional district boundaries in the 1960’s, some of them more than once (see Appendix B, page 549).

REAPPORTIONMENT AND REDISTRICTING BASED ON 1970 CENSUS

As a result of reapportionment based on the 1970 census, five States gained Representatives: Arizona, 1; California, 5; Colorado, 1; Florida, 3; and Texas, 1. Nine States lost Representatives: Alabama, 1; Iowa, 1; New York, 2; North Dakota, 1; Ohio, 1; Pennsylvania, 2; Tennessee, 1; West Virginia, 1; and Wisconsin, 1.

Effective for the 93d Congress, 40 States revised their congressional district boundaries during 1971-1972 (see Appendix B). North Dakota joined the list of five others having only one Representative—Alaska, Delaware, Nevada, Vermont, and Wyoming. Four other States—Hawaii, Maine, Nebraska, and New Mexico—did not change their boundaries (except for Hawaii, the 1970 census had left their existing districts nearly equal in population).

The effect of the “one man, one vote” rule is shown in the following table, which summarizes the distribution of districts by their variations from the State average district populations for the 93d Congress and compares it with the 88th Congress ten years earlier.

Percent deviation from State average congressional district population	93d Congress	88th Congress
Total number of congressional districts*	429	413
Less than 1 percent	385	9
1 to 5 percent	41	81
5 to 10 percent	3	87
10 percent and over	—	236
Average percent deviation . . .	0.4	17.0

*In addition, in the 88th Congress there were 22 members elected at large, compared with 6 in the 93d Congress.

COMPILATION OF DATA

The statistics in this volume were obtained, except for elections, from the 1970 Census of Population and Housing. The published census reports include only total population figures for congressional districts. To obtain the data on population and housing characteristics presented in this volume, it was necessary to prepare special tabulations from the 1970 census files. The elections data shown (for 1966, 1968, and 1970) were obtained from the National Republican Congressional Committee, Washington, D.C. 20003.

AVAILABILITY OF COMPUTER TAPE

The base file of 1970 census data for districts of the 93d Congress, from which the figures in this book were compiled, is available from the Bureau of the Census on a single reel of magnetic tape. The price is \$70. For details, write to: Users' Service Staff, Bureau of the Census, Washington, D.C. 20233.

PRESENTATION OF DATA

The principal table presents the same items of information for all of the districts. The numbering of items is uniform to facilitate district-to-district and State-to-State comparisons and reference to the definitions and explanations.

A second table for each State presents a selection of basic population characteristics for places with 10,000 inhabitants or more in each congressional district.

In addition, there are three appendix tables. Appendix A (page 548) shows the apportionment of membership in the House of Representatives, by States, from the adoption of the Constitution to 1970. Appendix B (page 549) presents a record of congressional redistricting by the States from 1960 to 1972. Appendix C (page 550) shows the population of the smallest and largest congressional districts, by States, for the 88th Congress, based on the 1960 census, and for the 93d Congress, based on the 1970 census.

MAPS

The congressional district boundaries shown on the maps in this book are those in effect for the 93d Congress. These boundaries were plotted on the maps by the Bureau of the Census from the descriptions in the State law and/or court order establishing the congressional districts within each State. The maps are of two types: State maps and inset maps.

The State maps, in addition to congressional district boundaries, show the outline and name of each county, the State capital, and generally all cities of 25,000 inhabitants or more. Where spotting of all qualifying cities would make the maps difficult to read, only selected cities are shown. Each congressional district shows at least one city. For congressional districts which do not have a city of 25,000

population, the largest city is shown. For the States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont, the State maps also show all towns, independent cities, and selected dependent municipalities.

Shading on the State map depicts counties with two or more congressional districts and indicates that inset maps are included showing greater detail. For the six New England States, only the counties that have two or more congressional districts and that have inset maps showing greater detail are shaded; where counties are split only along town boundaries as shown on the State map, more detailed maps are not provided.

Larger scale inset maps showing geographic detail of selected congressional district boundaries are provided when, in the judgment of Census Bureau staff, the boundaries shown on the State maps cannot delineate the limits of congressional districts with sufficient exactness.

The Bureau of the Census has also issued a United States map (30 inches by 45 inches) entitled *Congressional Districts for the 93d Congress*, showing States, counties, and congressional district boundaries and numbers. This map, as well as the *Congressional District Atlas* for the 93d Congress, referred to at the beginning of this Introduction, may be purchased for 40 cents and \$3.70, respectively, from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

RELATIONSHIP TO STATISTICAL ABSTRACT PROGRAM

The annual *Statistical Abstract of the United States* is necessarily limited primarily to the presentation of current data for the country as a whole. To a much lesser extent, it presents data for regions, divisions, and States and for historical series. The supplements to the *Abstract* broaden its scope both geographically and historically.

The *Congressional District Data Book* is one of the *Abstract's* small-area supplements. Another small-area supplement is the *County and City Data Book*. The 1972 edition presents summary information for counties, cities, standard metropolitan statistical areas, urbanized areas, and unincorporated places. The items included are based largely on results of the most recent censuses conducted by the Bureau of the Census. Earlier editions of the *County and City Data Book* were compiled in 1967, 1962, 1956, 1952, 1949, and 1947.

SUGGESTIONS AND COMMENTS

In the planning of revisions of a standard volume, the compiling agency finds it particularly helpful to receive the reactions of the users of each edition. To this end, users of this volume are encouraged to send in their suggestions and comments.

SUGGESTIONS AND COMMENTS

should be sent to:

The Director, Bureau of the Census, Washington, D.C. 20233

DEFINITIONS AND EXPLANATIONS

The statistics presented here are for congressional districts as defined for elections to the 93d Congress in November 1972.

VOTE CAST, BY MAJOR PARTY

Items 1-17. Vote cast for President, 1968, and vote cast for Representative, 1966 to 1970.

Source: National Republican Congressional Committee, *Congressional District Vote Comparison*, Tabulated in Accordance with Congressional Districts as Constituted for the 1972 Elections.

As a result of legislation enacted by the Congress in 1970 and adoption of the 26th Amendment to the U.S. Constitution in 1971, the minimum voting age is 18 in all States, for State and local elections as well as national elections. However, for the elections shown here, the minimum voting age was 21 in all States except Georgia and Kentucky (18 years), Alaska (19 years), and Hawaii (20 years).

Figures are for districts as constituted for the November 1972 congressional elections and not as they were at the time of each election. The original figures for each election year shown were retabulated by the Committee to reflect the congressional district boundaries as established for the 1972 elections. Thus, the data purport to show what the party vote would have been if the 1972 boundaries had been in effect for each election. Furthermore, it should be noted that the figures for "vote cast for Representative" are strictly in terms of *party* vote, and are not necessarily comparable as vote cast for particular candidates. Also, the vote cast for third parties endorsing the major party candidates are excluded from figures shown here for "Democratic" and "Republican" but included in the total vote cast in the district.

CENSUS OF POPULATION, 1970

Items 18-233. General note.

Source: U.S. Bureau of the Census, 1970 Census of Population, special tabulations and records.

The population statistics presented here are based on results of the Nineteenth Decennial Census of Population, conducted by the Bureau of the Census as of April 1, 1970. Corresponding data for States and counties appear in Volume I, *Characteristics of the Population*.

Except for population counts, land area, and population per square mile, the data were obtained from *representative samples of the population rather than complete count*. The

samples consisted of 5 percent, 15 percent, and 20 percent, depending on the subject covered. The sample data have been "weighted" or "inflated" to reflect the entire population or universe. Exact agreement therefore is not to be expected between data based on samples shown here and data resulting from complete counts shown in other reports. Furthermore, the figures presented here may differ somewhat from figures for the same items shown in the series of separate State reports, *Congressional District Data: Districts of the 93d Congress* (Series CDD-93X), as well as in the earlier series, *Congressional District Data: Districts of the 92d Congress* (Series CDD-92), because the data in those reports were based on a complete count. For a measure of the sampling variability of the sample data and for comment regarding reliability of all the data, see the section on "Accuracy of the Data" in *U.S. Census of Population: 1970, Vol. I, Characteristics of the Population*.

In addition, the figures presented here may differ from those appearing in other Bureau of the Census reports because the data shown here for items other than the State or congressional district population totals include adjustments for consistency with the State apportionment population total. As a result, the congressional district figures for population characteristics (age, sex, race, residence, employment, etc.) may not add to the State totals for each characteristic. Minor discrepancies in summation for given characteristics (such as age or sex) to congressional district or State levels may also be due to rounding.

Items 18-21. Total population, 1970 and 1960.

The 1970 and 1960 populations of these districts were compiled from the 1970 and 1960 Censuses of Population by aggregating figures for the areas comprising the districts, such as counties, minor civil divisions, census tracts, enumeration districts, block groups, and blocks.

In accordance with census practice dating back to 1790, each person enumerated in the 1970 census was counted as an inhabitant of his *usual place of residence*, which is generally construed to mean the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile. In the vast majority of cases, however, the use of these different bases of classification would produce substantially the same statistics, although there may be appreciable differences for a few areas. Persons without a usual place of residence were, however, counted where they were enumerated. Detailed information on residence rules is given in *U.S. Census of Population: 1970, Vol. I, Characteristics of the Population*.

Items 22-23. Average population per district and population above or below average.

The average population per district is the State total population divided by the number of congressional districts in the State. The variation of each district's population count from the State average (plus or minus) is shown in absolute numbers and in percent.

Items 24-25. Land area and population per square mile.

The land area totals include dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres in area.

For whole-county districts (those consisting of one or more entire counties), land area measurements were computed by cumulating the county area figures. For split-county districts (those which do not follow county lines), the Bureau of the Census computed the ratio of the area of a particular district to the area of the entire county in which the district is located. The land area of the district was then calculated as a percent of the total land area of the county.

Items 26-38. Sex and residence.

The urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except in Alaska), and towns (except in the New England States, New York, and Wisconsin), but excludes persons living in rural portions of extended cities (i.e., cities whose boundaries have been extended to include sizable portions of territory that is rural in character, such as city-county consolidations); (b) unincorporated places of 2,500 inhabitants or more; and (c) other territory, incorporated or unincorporated, included in urbanized areas (a central city or cities and surrounding closely settled territory).

The population not classified as urban constitutes the rural population. The rural farm population consists of persons living on places of 10 or more acres from which sales of farm products amounted to \$50 or more in 1969 or on places of less than 10 acres from which sales of farm products amounted to \$250 or more in 1969. Persons in rural territory who did not meet the definition for farm population were classified as rural nonfarm residents. All persons living in group quarters except those in agricultural workers camps on farms were classified as nonfarm.

Metropolitan area population comprises all persons living inside standard metropolitan statistical areas (SMSA's). For the 1970 Census of Population, the Bureau of the Census recognized 243 SMSA's in the United States and 4 in Puerto Rico, making a total of 247. These include the 231 SMSA's defined in the Bureau of the Budget publication, *Standard Metropolitan Statistical Areas: 1967*, U.S. Government Printing Office, Washington, D.C. 20402; two SMSA's defined in January 1968; and an additional 14 defined in February 1971. SMSA's are defined by the Office of Management and Budget (formerly Bureau of the Budget).

Except in the New England States, a standard metropolitan statistical area is a county or group of contiguous counties which contains at least one city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are socially and economically integrated with the central city. In the New England States, SMSA's consist of towns and cities instead of counties. Each SMSA must include at least one central city, and the complete title of an SMSA identifies the central city or cities. For a detailed description of the criteria used in defining SMSA's, see *Standard Metropolitan Statistical Areas: 1967*, cited above.

The population living outside SMSA's constitutes the nonmetropolitan population.

Items 39-80. Race and nativity.

The concept of race as used by the Bureau of the Census does not denote clear-cut scientific definitions of biological stock. Rather it reflects self-identification by respondents. Since the 1970 census obtained information on race primarily through self-enumeration, the data represent essentially self-classification by people according to the race with which they identify themselves.

The category "white" includes persons who indicated their race as white, as well as persons who did not classify themselves in one of the specific race categories on the questionnaire but entered Mexican, Puerto Rican, or a response suggesting Indo-European stock.

The category "Negro" includes persons who indicated their race as Negro or Black, as well as persons who did not classify themselves in one of the specific race categories on the questionnaire but who had such entries as Jamaican, Trinidadian, West Indian, Haitian, and Ethiopian.

The category "Indian" includes persons who indicated their race as American Indian or who reported for this item only the name of an Indian tribe.

For persons of mixed parentage who were in doubt as to their classification, the race of the person's father was used.

The category "native" comprises persons born in the United States, the Commonwealth of Puerto Rico, an outlying area of the United States, or at sea. Also included in this category is the small number of persons who, although they were born in a foreign country, have at least one native American parent. The category "foreign born" includes all persons not classified as native. "Native of foreign or mixed parentage" comprises native persons, one or both of whose parents are foreign born.

The category "foreign stock" includes the foreign-born population and the native population of foreign or mixed parentage. In this report, persons of foreign stock are classified according to their country of origin. Natives of foreign parentage whose parents were born in different countries are classified according to the country of birth of the father. Natives of mixed parentage are classified

according to the country of birth of the foreign-born parent.

The inquiries in the 1970 census permit the identification of persons of "Spanish heritage" by various means: Birthplace, birthplace of parents, language, surname, and a direct query on origin and descent.

The specific types of identification are as follows:

Spanish language.—Data on mother tongue were used as the basis for defining the Spanish language population. In 42 States and the District of Columbia, this population includes persons who reported Spanish as their mother tongue, as well as persons in families in which the head or wife reported Spanish as his or her mother tongue. In five Southwestern States—Arizona, California, Colorado, New Mexico, and Texas—persons of Spanish language also include all additional persons of Spanish surname. In three Middle Atlantic States—New York, New Jersey, and Pennsylvania—statistics for Puerto Ricans replace statistics for persons of Spanish language.

Spanish surname.—The identification of persons with Spanish surnames was performed by means of a list of over 8,000 Spanish surnames originally compiled by the Immigration and Naturalization Service (and later updated by the Census Bureau). Data for persons with Spanish surnames are shown only for five Southwestern States (Arizona, California, Colorado, New Mexico, and Texas).

Puerto Ricans.—Persons of Puerto Rican birth or parentage in the United States include persons born in Puerto Rico and persons born in the United States or an outlying area with one or both parents born in Puerto Rico.

Mother tongue relates to the language spoken in the person's home when he was a child.

Ethnic data are shown for the following categories, only if the State total for the particular group is 25,000 or more (50,000 or more in California and New York): American Indians, Japanese, Chinese, Filipino; population of Spanish heritage; country of origin of foreign stock; and mother tongue.

Items 100-117. Age.

The age classification is based on the age of the person in completed years as of April 1, 1970.

The median age is that age which divides the distribution into two equal parts, one-half of the persons being older than the median age and the other half younger.

Since adoption of the 26th Amendment to the U.S. Constitution in 1971, the minimum voting age is 18 in all the States. Therefore the median age of voting age population (item 117) was computed on the total number of persons 18 years old and over.

Items 118-122. Households and families.

A household includes all the persons who occupy a housing unit. A house, an apartment or other group of

rooms, or a single room is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters, that is, when the occupants do not live and eat with any other persons in the structure, and there is either (a) direct access from the outside or through a common hall, or (b) complete kitchen facilities for the exclusive use of the occupants.

A family consists of a household head and one or more other persons living in the same household who are related to the head by blood, marriage, or adoption; all persons in a household who are related to the head are regarded as members of his (her) family. Not all households contain families, because a household may be composed of a group of unrelated persons or one person living alone.

An unrelated individual may be any of the following: A household head living alone or with nonrelatives only, a household member not related to the head, or a person living in group quarters who is not an inmate of an institution.

Persons in living arrangements other than households are classified as living in group quarters. Group quarters are located most frequently in institutions, rooming houses, military barracks, college dormitories, fraternity and sorority houses, hospitals, monasteries, convents, and ships. A house or apartment is considered group quarters if it is shared by the person in charge and five or more persons unrelated to him, or, if there is no person in charge, by six or more unrelated persons.

Inmates of institutions are persons under care or custody at the time of enumeration in homes, schools, hospitals or wards for juveniles, the physically handicapped, or the mentally handicapped; homes or hospitals for mental, tubercular, or other chronic disease patients; homes for unwed mothers; nursing, convalescent, and rest homes; homes for the aged and dependent; and correctional institutions.

Items 123-132. Marital status.

Marital status refers to status at time of enumeration. Persons classified as "married" consist of those who have been married only once and those who remarried after having been widowed or divorced. Persons reported as separated (living apart because of marital discord, with or without a legal separation) are excluded from the "married" category. Persons in common-law marriages are classified as married. Persons whose only marriage had been annulled are classified as "single," along with all persons reported as never married. Differences between the number of married males and the number of married females arise from the fact that some husbands and wives have their usual residences in different areas.

Items 133-147. Education.

School enrollment is shown for persons 3 to 34 years old. Persons were included as enrolled in school if they reported attending a "regular" school or college at any time between February 1, 1970, and the time of enumeration. Regular schooling is that which may advance a person toward an elementary school certificate or high school

diploma, or a college, university, or professional degree. Schooling that was not obtained in a regular school and schooling from a tutor or through correspondence courses were counted only if the credits obtained were regarded as transferable to a school in the regular school system. Persons were included as enrolled in nursery school only if the school included instruction as an important and integral phase of its program. Schooling which is generally regarded as not "regular" includes that given in nursery schools which simply provide custodial day care, in specialized vocational, trade, or business schools, in on-the-job training, and through correspondence courses.

Elementary school, as defined here, includes grades 1 to 8, and high school includes grades 9 to 12. If a person was attending a junior high school, the equivalent in terms of 8 years of elementary school and 4 years of high school was recorded. In general, a "public" school is defined as any school which is controlled and supported primarily by a local, State, or Federal Government agency. A "private" school is one which is controlled and supported primarily by a religious organization or other private group.

The data on years of school completed were derived from the answers to two questions: (a) "What is the highest grade (or year) of regular school he has ever attended?" and (b) "Did he finish the highest grade (or year) he attended?" Persons whose highest grade of attendance was in a foreign school system, or in an ungraded school where highest level of schooling was measured by "readers," or whose training was received through a tutor were instructed to report the approximate equivalent grade in the regular United States school system. A person was reported as not having completed a given grade if he dropped out or failed to pass the last grade attended.

The median number of school years completed (item 147) is the value which divides the population group into two equal parts—one having completed more, and the other less, schooling than the median.

Items 148-167. Income in 1969.

Information on money income received in the calendar year 1969 was requested from persons 14 years old and over. "Total income" is the algebraic sum of the amounts reported separately for wage and salary income, nonfarm net self-employment income, farm net self-employment income, Social Security or railroad retirement income, public assistance or welfare income, and all other income. The figures represent the amount of income received before deductions for personal income taxes, Social Security, bond purchases, union dues, medicare deductions, etc.

Receipts from the following sources were not included as income: Money received from the sale of property (unless the recipient was engaged in the business of selling such property); the value of income "in kind" such as free living quarters or food produced and consumed in the home; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the same household; gifts and lump-sum inheritances, insurance payments, and other types of lump-sum receipts.

Family income is the sum of income received by all family members 14 years old and over. Although the income statistics cover the calendar year 1969, the characteristics of persons and the composition of families refer to the time of enumeration (April 1, 1970). For most families, however, the income reported was received by persons who were members of the family throughout 1969.

The median income is the amount which divides the distribution into two equal groups, one having incomes above the median and the other having incomes below the median. For families and unrelated individuals the median income is based on the distribution of the total number of families and unrelated individuals, including those with no income.

Per capita income (item 160) is computed by dividing the aggregate income of all persons by the total number of persons, including those who had no income.

Families and unrelated individuals are classified as being above or below the low income level (items 161-167) using the low income level index adopted by a Federal Inter-agency Committee in 1969. This index provides a range of income cutoffs or "low income thresholds" adjusted to take into account such factors as family size, sex and age of the family head, the number of children, and farm-nonfarm residence. These income cutoffs are updated every year to reflect changes in the Consumer Price Index.

In 1969, low income levels ranged from \$1,487 for a female unrelated individual 65 years old and over living on a farm to \$6,116 for a nonfarm family with a male head and with seven or more persons. The average low income level for a nonfarm family of four headed by a male was \$3,745.

Low income levels are computed on a national basis only. No attempt has been made to adjust these thresholds for regional, State, or other local variations in the cost of living.

Low income level measures exclude inmates of institutions, members of the Armed Forces living in barracks, college students living in dormitories, and unrelated individuals under 14 years old.

Items 168-174. Veteran status.

A veteran, as defined here, is a civilian male 18 years old and over who has served but is not now serving in the Armed Forces of the United States. A veteran who served in more than one war or conflict is classified according to the last one in which he served.

Items 175-186. Employment status.

The data on employment status relate to the calendar week prior to the date on which the persons provided the information. This week is not the same for all persons because not all were enumerated during the same week; the majority, however, were enumerated during the first half of April 1970.

Employed persons comprise all civilians 16 years old and over who were either (a) "at work"—those who did any work at all as paid employees or in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers on a family farm or in a family business; or (b) were "with a job but not at work"—those who did not work during the reference week but had jobs or businesses from which they were temporarily absent due to illness, bad weather, industrial dispute, vacation, or other personal reasons. Excluded from the employed are persons whose only activity consisted of work around the house or volunteer work for religious, charitable, and similar organizations.

Persons are classified as unemployed if they were civilians 16 years old and over and: (a) were neither "at work" nor "with a job, but not at work" during the reference week, (b) were looking for work during the past 4 weeks, and (c) were available to accept a job. Persons who did not work at all during the reference week and were waiting to be called back to a job from which they had been laid off are also included as unemployed.

The "civilian labor force" comprises persons classified as employed or unemployed (described above). The "total labor force" includes all persons in the civilian labor force plus members of the Armed Forces (persons on active duty).

Items 187-192. Class of worker.

These items refer to the same jobs as are included in the industry and occupation data (items 193-227). The placement of a person in a particular class-of-worker category is basically independent, however, of the industry or occupation in which he worked. The data relate to the job held during the calendar week prior to the date on which the person provided the information. For a person employed at two or more jobs, the job at which he worked the greatest number of hours was reported.

The categories are defined as follows:

Private wage and salary workers.—Persons who worked for a private employer for wages, salary, commission, tips, pay-in-kind, or at piece rates. Since all employees of corporations are classified as private wage and salary workers, this category includes persons who consider themselves as self-employed but work for corporations. (In most cases the respondent will own or be part of a group that owns controlling interest in the corporation.)

Government workers.—Persons who worked for any governmental unit, regardless of the activity of the particular agency. This category is subdivided by the level of government: (a) Federal, (b) State, and (c) local (county, city, village, township, etc.).

Self-employed workers.—Persons who worked for profit or fees in their own unincorporated business, profession, or trade, or who operated a farm. Included here are the owner-operators of large stores and manu-

facturing establishments as well as small merchants, independent craftsmen and professional men, farmers, peddlers, and other persons who conducted enterprises on their own.

Items 193-204. Industry.

These data were obtained from persons in their own households and differ from figures obtained from business establishments, farm enterprises, and certain governmental programs. For example, data from households refer to place of residence, represent an unduplicated count, and cover all types of workers; whereas data from business establishments, etc., refer to place of work, include more than once those persons who worked for more than one establishment during the reporting period, and generally exclude private household workers, unpaid family workers, and self-employed workers. In addition, somewhat different industrial classification systems are normally used for the two types of data. See also text for items 187-192.

The industry classification system developed for the 1970 Census of Population consists of 227 categories classified into 12 major industry groups. Employment data are shown here for 11 of the 12 major industry groups, the one exception being "entertainment and recreation services." For the composition of the industry groups and each specific category, and additional information on the industry classification system, see Bureau of the Census, *1970 Census of Population Classified Index of Industries and Occupations*, U.S. Government Printing Office, Washington, D.C., 1971.

Items 205-227. Occupation.

The occupation classification system developed for the 1970 Census of Population consists of 441 specific occupation categories arranged into 12 major occupation groups. The 12 major groups are combined into four occupation divisions—white collar, blue collar, farmworkers, and service workers. Data are shown here for the four divisions and for the major occupation groups included in the white collar and blue collar classifications, except that "operatives, except transport" and "transport equipment operatives" are combined. The figures for farmworkers include "farmers and farm managers" and "farm laborers and farm foremen." The figures for service workers include private household workers, shown separately under "female employed." See also text for items 187-192.

Additional information on the composition of the detailed categories and major occupation groups may be found in Bureau of the Census, *1970 Census of Population Classified Index of Industries and Occupations*, cited under items 193-204.

Items 228-229. Means of transportation to work.

The figures refer to the chief means of travel or type of conveyance used in traveling to and from work on the last day the respondent worked at the address given as his or her place of work. "Chief means" refers to the means of transportation covering the greatest distance if more than

one means was used in daily travel. Public transportation includes buses, streetcars, subways, elevated trains, and railroads.

Items 230-233. Migration.

The data on residence in 1965 refer to the usual place of residence on April 1, 1965, of all persons who were 5 years old or over on April 1, 1970. Residence in 1965 was used in conjunction with residence in 1970 to determine the extent of mobility of the population. The category "same house" includes all persons who did not move during the 5 years as well as those who had moved but by 1970 had returned to their 1965 residence. The category "different house" includes persons who, on April 1, 1965, lived in the United States in a different house from the one they occupied on April 1, 1970, and for whom sufficient information concerning the 1965 residence was collected. The category "abroad" includes those with residence in a foreign country or an outlying area of the United States in 1965.

CENSUS OF HOUSING, 1970

Items 234-303. General note.

Source: U.S. Bureau of the Census, 1970 Census of Housing, special tabulations.

The housing statistics presented here are based on results of the 1970 Census of Housing, conducted by the Bureau of the Census as of April 1, 1970. Corresponding data for States and counties appear in Volume I, *Housing Characteristics for States, Cities, and Counties*.

Rather than complete counts, the data are based on representative samples consisting of 5 percent, 15 percent, and 20 percent, depending on the subject covered. See discussion of sampling versus complete count under General note for items 18-233. For a measure of the sampling variability and a discussion of the sample design and reliability of the data, see the section on "Accuracy of the Data" in *U.S. Census of Housing: 1970*, Vol. I, *Housing Characteristics for States, Cities, and Counties*.

See also General note for items 18-233 for explanation of other differences between figures shown here and those in other census reports.

Items 234-235. Housing units.

A housing unit is a house, an apartment or other group of rooms, or a single room occupied or intended for occupancy as separate living quarters; that is, the occupants do not live and eat with any other persons in the structure, and there is either (a) direct access from the outside or through a common hall, or (b) complete kitchen facilities for the exclusive use of the occupants. Mobile homes, trailers, tents, boats, and railroad cars are included if they are occupied as living quarters; they are excluded if they are vacant or used only for extra sleeping space, vacations, or business. Hotel and motel accommodations are included as housing units if they are the usual residence of the occupants. Vacant rooms or suites of rooms are classified as housing units only in those hotels in which 75 percent or more of the accommodations are occupied by permanent

residents. In institutions, dormitories, residence halls, or similar places, living quarters of staff personnel are classified as separate housing units if they satisfy the housing unit criteria.

Occupied quarters which do not qualify as housing units are considered as group quarters and are not included in the housing inventory. See also text for items 118-122.

Vacant housing units intended for year-round occupancy and vacant units intended for seasonal occupancy or held for migratory labor are included in the total housing inventory (item 234, All housing units). Year-round housing units (item 235) include vacant units intended for year-round use, but exclude vacant units held for seasonal occupancy or for migratory labor because it is difficult to obtain reliable information for them. The characteristics presented here are limited to year-round housing units.

Items 236-238. Urban and rural housing.

Urban housing comprises all housing units located in places defined as urban by the Bureau of the Census. In rural areas, housing units are subdivided into rural farm and rural nonfarm housing. For definitions of urban and rural, see text for items 26-38.

Items 239-244. Metropolitan and nonmetropolitan housing.

For a definition of standard metropolitan statistical areas (SMSA's), see text for items 26-38.

Items 245-254. Occupied units.

A housing unit is defined as occupied if it is the usual place of residence of the person or group of persons living in it at the time of census enumeration or if the occupants are only temporarily absent—for example, on vacation.

A housing unit is classified as owner-occupied if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. All other occupied units are classified as renter-occupied, whether rented for cash or occupied without payment of cash rent.

Occupied housing units are classified by race according to the race of the head of the household.

Items 255-259. Units, by number of rooms.

Rooms include whole rooms used for living purposes, such as living rooms, dining rooms, kitchens, bedrooms, finished recreation rooms, family rooms, etc. Bathrooms, halls, kitchenettes, utility rooms, unfinished attics and basements, etc., are not included in the count of rooms.

The median is the value which divides the distribution of housing units into two equal parts—one-half the units having more rooms and the other half having fewer rooms than the median.

Items 260-264. Units, by number in structure.

A structure is defined as a separate building that either has open space on all sides or is separated from other structures by dividing walls that extend from ground to

roof. The number of units in a structure comprises both occupied and vacant housing units.

Mobile homes and trailers are shown as a separate category. When one or more rooms have been added to a mobile home or trailer it is classified as a one-family house. However, if only a porch or shed has been added, it is still counted as a mobile home or trailer.

Items 265-268. Units, by year structure built.

“Year structure built” refers to the date of original construction, not to any later remodeling, addition, or conversion.

Items 269-271. Units, by number of complete bathrooms.

A housing unit has a complete bathroom if it has piped hot water and a room with a flush toilet, bathtub or shower, and wash basin for the exclusive use of the occupants of the unit. A half bathroom has either a flush toilet or bathing facilities for exclusive use. Units “with other bathroom arrangement or none” (item 271) include those with bathroom facilities which are also for the use of the occupants of other housing units as well as those which do not have a complete bathroom.

Items 272-275. Plumbing facilities.

Occupied housing units with all plumbing facilities are units which have piped hot and cold water inside the structure and flush toilet and bathtub or shower inside the structure for the exclusive use of the occupants of the unit. Units lacking some or all plumbing facilities are those lacking one or more of the facilities just named and those whose toilet or bathing facilities are used also by occupants of other units.

Items 276-280. Persons per occupied unit.

All persons occupying the housing unit are counted. The number includes not only occupants related to the head of the household but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters of the household head.

The median is the value which divides the distribution of housing units into two equal parts—one-half the units having more persons and the other half having fewer persons than the median.

Items 281-282. Persons per room of occupied units.

The number of persons per room is computed for each occupied housing unit by dividing the number of persons in the unit by the number of rooms in the unit.

Items 283-284. Automobiles available per household.

Automobiles available to a housing unit represent the number of passenger automobiles, including station wagons, which are owned or regularly used by any member of the household and which are ordinarily kept at home. Leased and company-owned automobiles kept at home are included. Taxicabs, pickups, or larger trucks are not included.

Items 285-294. Value.

For definition of owner-occupied units, see text for items 245-254.

Value is the respondent’s estimate of how much the property (house and lot) would sell for if it were for sale in April 1970. The term “specified owner-occupied” means that the value data are limited to owner-occupied one-family houses on less than 10 acres, without a commercial establishment or medical office on the property. Owner-occupied cooperatives, condominiums, mobile homes, and trailers are excluded from the value tabulations.

The median value is the value which divides the distribution of units into two equal parts—one-half the units falling below this value and the other half exceeding it.

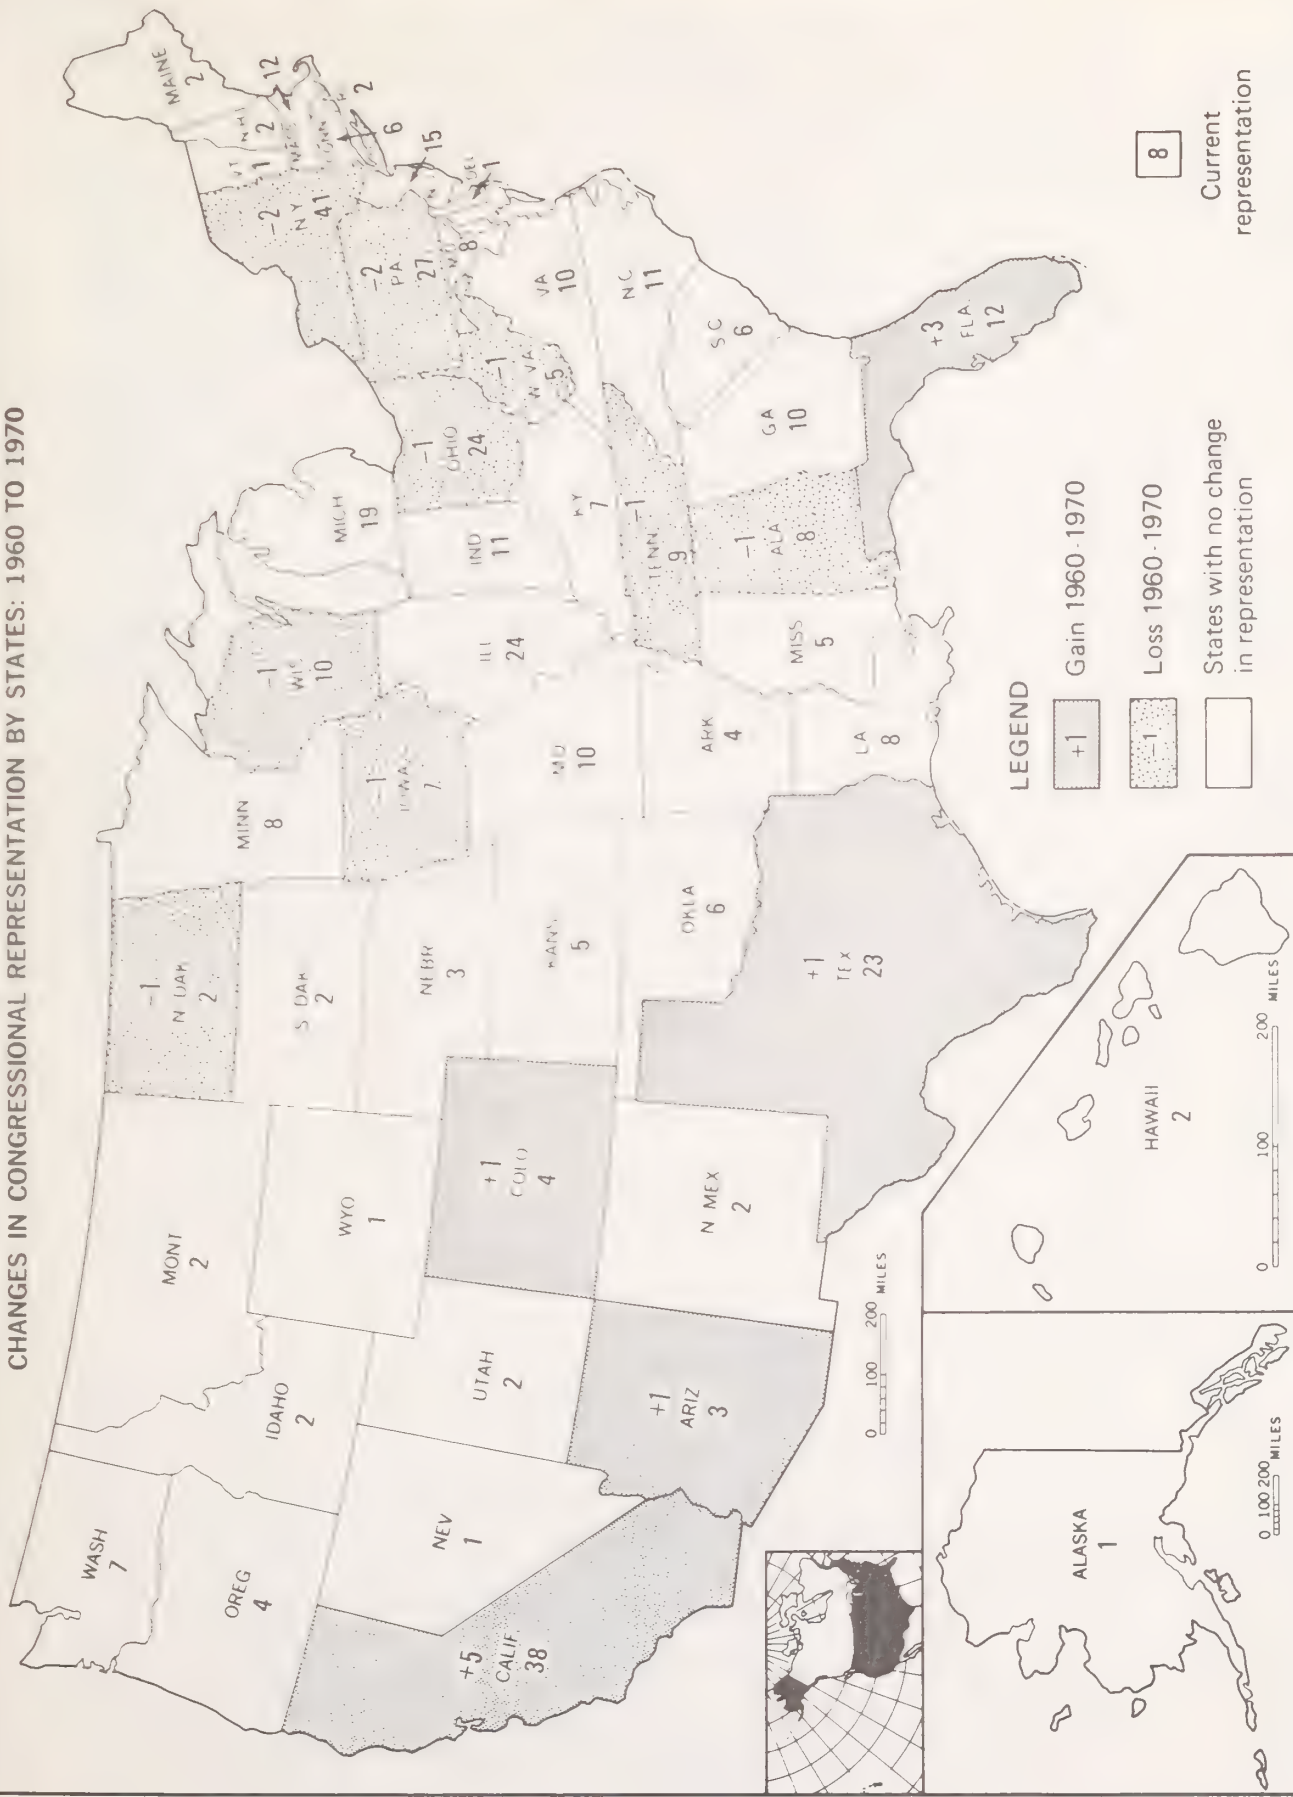

Items 295-303. Gross rent.

For definition of renter-occupied units, see text for items 245-254.

Gross rent is the contract rent (the monthly rent agreed upon) plus the estimated average monthly cost of utilities (water, electricity, gas) and fuels, such as wood, coal, and oil if these items are paid for by the renter. The term “specified renter-occupied” means that the rent data exclude one-family houses on 10 acres or more and units occupied without payment of cash rent.

The median rent is the rent which divides the distribution of units into two equal parts—one-half the units falling below this rent and the other half exceeding it. Renter units occupied without payment of cash rent were excluded from the computation of the median.

- Represents zero. X Not applicable.

* Data for congressional districts reflect party vote for Representatives and are not necessarily comparable as vote cast for individual candidates; see text. State totals include absentee votes in Jefferson County not distributed in district-by-district tabulation.

¹ No candidate in this district as constituted before redistricting.

² Comprises vote for Humphrey as candidate of the Alabama Independent Democratic Party and the National Democratic Party of Alabama.

³ Comprises vote for Wallace under banner of the Democratic Party whose presidential elector slate was pledged to Wallace.

*Data for congressional districts reflect party vote for Representatives; not necessarily comparable as vote cast for individual candidates. See text. Due to minor discrepancies in the Maricopa County precinct returns, the district-by-district tabulations do not always conform to the official State totals shown.

¹ Includes new-resident vote in Maricopa County, omitted from district-by-district tabulation.

- Represents zero. NA Not available. X Not applicable.

*Data for congressional districts reflect party vote for Representatives; not necessarily comparable as vote cast for individual candidates. See text.

¹ Excludes votes for unopposed candidates; not required by law to be tabulated.

² No vote tabulated in elections in which a candidate runs unopposed. Where figures are shown, they represent vote cast in counties transferred as a result of redistricting from districts in which there were two candidates.

*Data for congressional districts reflect party vote for Representatives; not necessarily comparable as vote cast for individual candidates; see text.

¹The original tabulations for this book erroneously included the city of El Paso de Robles, in San Luis Obispo County, in the 12th Congressional District. It should have been included in the 36th District. The 1970 population of El Paso de Robles is 7,168. The total population figures for Congressional Districts 12 and 36 have been corrected to reflect this change; however, the data shown for characteristics of the population have not been corrected.

*Data for congressional districts reflect party vote for Representatives; not necessarily comparable as vote cast for individual candidates; see text.

¹The original tabulations for this book erroneously included the city of El Paso de Robles, in San Luis Obispo County, in the 12th Congressional District. It should have been included in the 36th District. The 1970 population of El Paso de Robles is 7,168. The total population figures for Congressional Districts 12 and 36 have been corrected to reflect this change; however, the data shown for characteristics of the population have not been corrected.

Map of Congressional Districts, Counties, and Selected Cities (10 Districts)

Districts established February 22, 1972

County with two or more Congressional Districts.
See inset maps.

U.S. DEPARTMENT OF COMMERCE
SOCIAL AND ECONOMIC STATISTICS ADMINISTRATION
BUREAU OF THE CENSUS

This map of Jackson County, Missouri, illustrates the county's geographical layout and administrative divisions. The western portion, shaded in light blue, is designated as the 'KANSAS CITY PART' and contains the number '5'. This area includes townships such as Kaw, Blue, Brookings, Raytown, Washington, and Grandview. The eastern portion, labeled '4 PART', is unshaded and includes townships like Independence, Lee's Summit, Unity, Prairie, Van Buren, and Lone Jack. The Missouri River flows along the northern border, while Sugar Creek and several lakes (Tapawingo, Jacomo, Lotawana, Otawana) are situated within the county. Major highways I-70 and I-49 are shown. The map also identifies various smaller communities and landmarks, such as Blue Summit, Sni-A-Bar, and Oak Grove.

This map of Dallas, Texas, is divided into six numbered parts, each with a distinct background color. The map includes the following details:

- Part 3 (Light Blue):** Central Dallas area, including University Park, Highland Park, and the central business district. Major roads like Loop 12 and the Dallas-Fort Worth Turnpike are shown.
- Part 4 (Light Green):** Northeastern Dallas, including areas like Sachse, Rowlett, and Lake Ray Hubbard.
- Part 5 (Light Yellow):** Eastern Dallas, including Mesquite and Sunnyvale.
- Part 6 (Light Purple):** Southern Dallas, including areas like Duncanville, Woodland Hills, De Soto, Lancaster, Hutchins, Wilmer, and Seagoville.
- Part 24 (Light Orange):** Western Dallas, including Grand Prairie and Freetown.
- Part 25 (Light Pink):** Southwestern Dallas, including Mountain Creek and Lakeview.

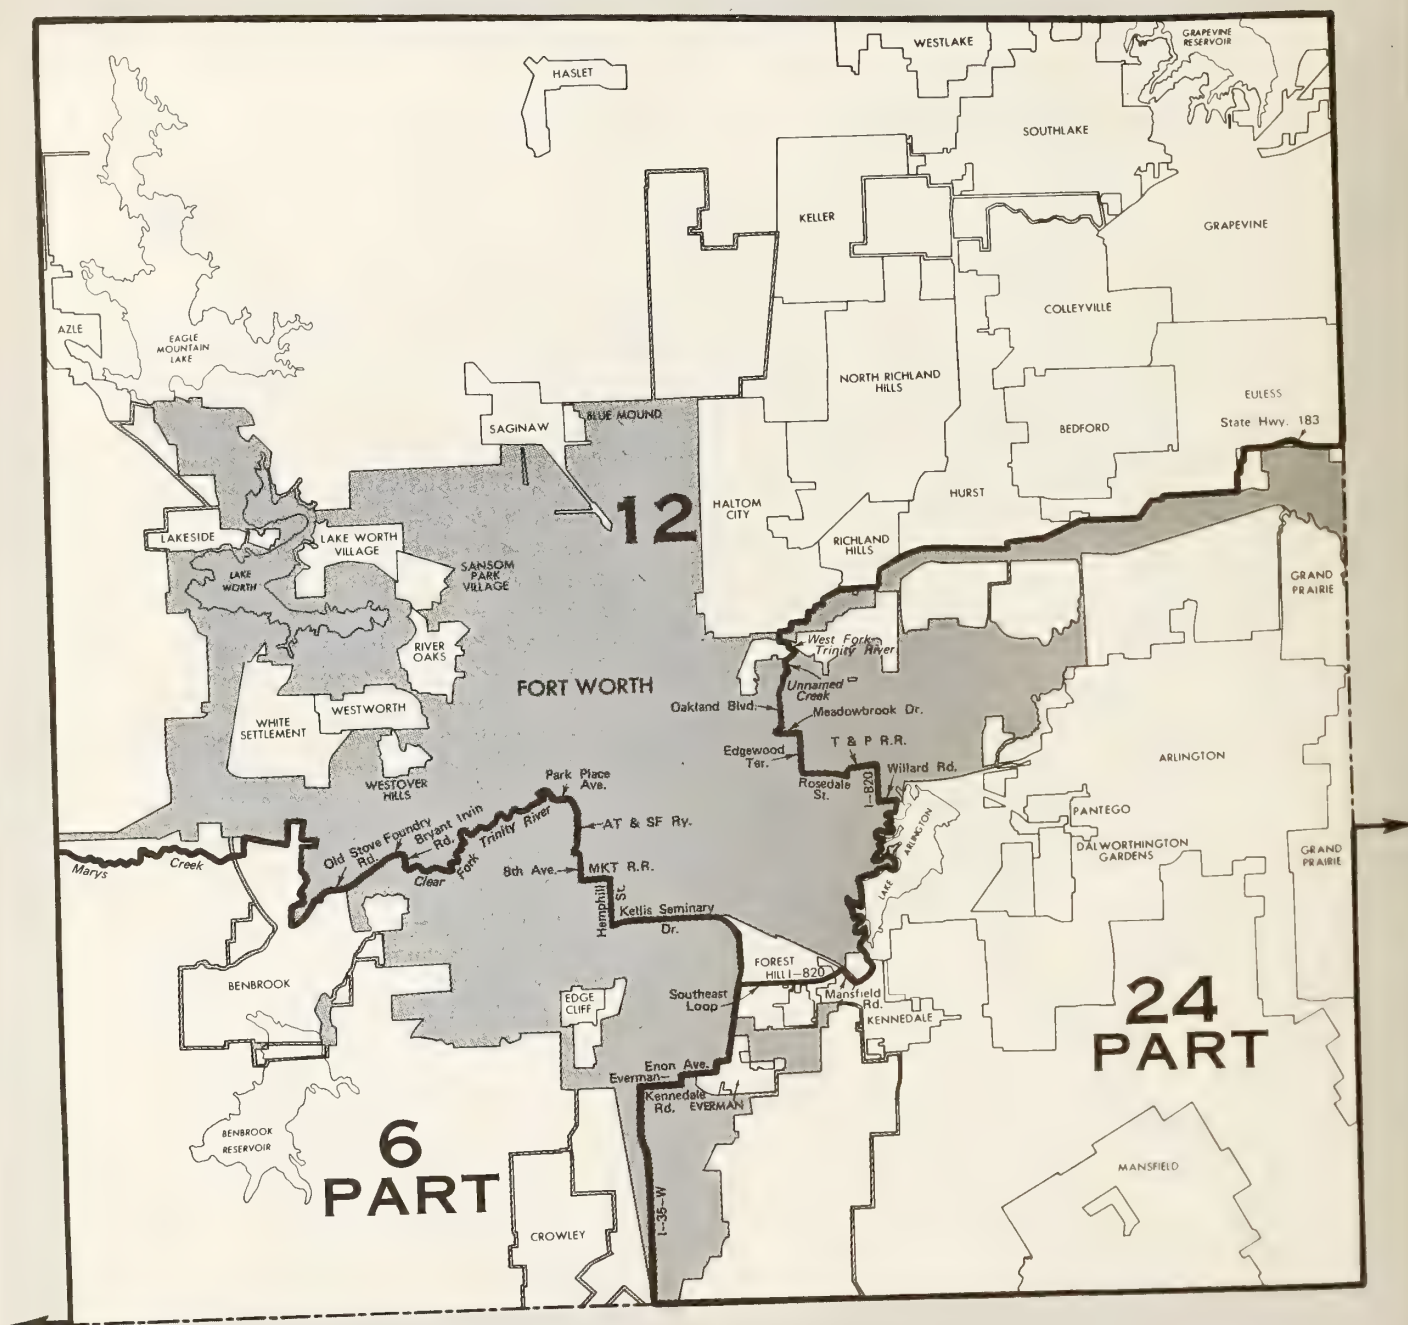

The map also shows major highways (e.g., I-35, I-635, Loop 12), streets (e.g., Elm St., Main St., Commerce St.), and geographical features (e.g., Trinity River, Mountain Creek, White Rock Lake). The city of Dallas is labeled in the center, and surrounding cities and towns are labeled around the perimeter.

Appendix A. Apportionment of Membership in House of Representatives, by States, From Adoption of Constitution to 1970 Census

Apportionments based on decennial censuses take effect with the Congress elected 2 years following. Population figures used for apportionment purposes are those determined for States by each decennial census. Until 1940, population for apportionment purposes excluded Indians not taxed and, until 1870, excluded two-fifths of slaves. Until 1850, apportionment ratios were chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U.S. divided by predetermined number of Representatives; from 1910 on, apportionment ratios shown were computed by dividing fixed number

(435) of Representatives into resident apportionment population but were not used in the original calculations, which were based on priority lists. No reapportionment based on 1920 Population Census. For discussion of apportionment methods, see S. Doc. No. 304, 76th Congress, 3d session, *A Survey of Methods of Apportionment in Congress*, by Edward V. Huntington. See also House Report No. 91-1314, 91st Congress, 2d session, *The Decennial Population Census and Congressional Apportionment*.

¹ Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See footnote 5.

² Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See footnote 5.

³ Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192).

⁴ Includes 1 member each assigned to Alaska and Hawaii after apportionment.

⁵ Assigned after apportionment.

⁶ Member seated in 1959.

⁷ Included in apportionment act in anticipation of statehood.

⁸ Included in the 20 members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).
